eMpower is a web based content management tool that allows non-technical content authors to submit, edit, review, and approve content using their favorite tools. Instead of relying on web developers you can write and deploy your own web content instantly. With eMpower you can manage content from databases, file systems, news feeds, and legacy system and provide participants a simple to-do list interface for completing tasks. You can also define workflow processes with e-mail notifications to manage the collective efforts of your team to keep a full approval history to ensure quality and accountability. It can provide you with the ability to schedule the launch and expiration of content and applications. Retain complete control over your e-business applications and content.
