

Email provides FACTS users with a new level of convenience that will enable them to work more efficiently and effectively.

FACTS Data Sheet: Email

The Email solution provides FACTS users with the ability to send emails directly from FACTS with reports and documents as attachments. This feature is designed to provide new levels of convenience and efficiency by allowing users to send FACTS reports and documents more quickly and more easily.

An email can be sent directly from any FACTS screen, whether you are working from a dumb terminal or a PC. Attachments such as documents and reports can be attached to the email as a text (.txt) file. With the addition of UnForm, the laser forms software for FACTS, the attachment can be sent as an Adobe Acrobat (.pdf) file. The PDF attachment contains all of the UnForm enhancements so they look just like the form printed on a laser printer.

Sending an email from FACTS is as easy as printing a report to a printer:

- Simply choose the email option instead of a printer
- FACTS automatically creates a new email, defaulting to the user's name and email address
- Enter the recipient information on the email entry screen
- Type in a custom message for the body of the email – as long or short as necessary
- Multiple recipients and types (ie. To, Cc, Bcc) are supported
- Email addresses can be stored in the email directory and searched for in email entry

System Requirements:

FACTS Email will operate on UNIX and Windows 2000. The FACTS server must have TCP/IP networking setup and be able to communicate with the SMTP email server. The email server may be in-house or hosted by an Internet Service Provider. MailCall is required.

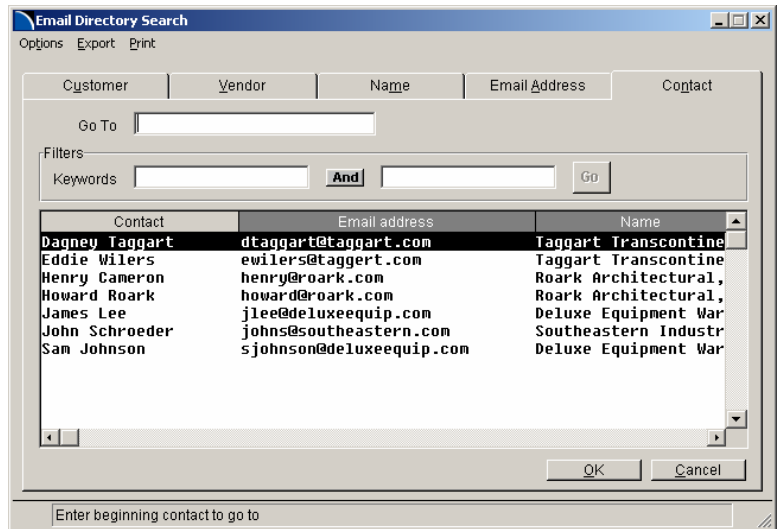

➔ A PARTNER SOLUTION ...

Developed by Earnest & Associates, an Authorized Infor Solution Partner, Email is certified by Infor as a leading solution for FACTS. By selectively creating alliances with partners that maintain the same the same rigorous quality standards for programming, design and functionality, Infor provides our customers with an expanded and enhanced FACTS solution.

Email Entry supports text and Adobe Acrobat attachments and multiple recipients. >>
